

Cyber Insurance & Loss Prevention

U.S. Risk Underwriters Inc. and Risk Analytics, LLC have teamed up to offer a one of a kind program that addresses the financial, regulatory and reputational exposures associate with a data security breach.

5 Key Benefits

Risk Identification and Assessment

Web-based policy and training solutions to help achieve regulatory compliance requirements

AutoShun technology will block attacks from known "criminal" IP addresses and network traffic by selected geographic areas

Sentinel technology will monitor the internal network for unauthorized network activity

Attack and policy violation reports will position an organization to prevent negligence based investigations to minimize the threat of post-breach legal matters

\$30M limits
